Zakaria Hafidoun

FULL-STACK DEVELOPER

Morocco | +212 611 602 629 | zakaria.hafidoun@gmail.com
github.com/Algorizmie | linkedin.com/in/algorizmie

PROFILE

Full-stack developer with 8 years in PHP, including 6+ years building with Laravel, and 5+ years in Vue.js and Inertia.js, building multi-tenant SaaS for Saudi and Moroccan companies. Owns features end-to-end: data modeling, API development, and the interface that consumes them. Ships his own SaaS products solo, one already on paid subscriptions. Recent React.js training on top of solid JavaScript/TypeScript, plus daily AI-assisted workflows.

SKILLS

FRONTEND	Vue.js, Inertia.js, React.js (recent experience), JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap
BACKEND	Laravel, PHP, REST API Design, SaaS & Multi-Tenant Architecture
DATABASES	SQL, Database Design, Data Modeling
DEVOPS & TOOLS	Git, Docker, VS Code
AI-ASSISTED DEVELOPMENT	Claude Code, Codex, Cursor, MCP Integrations
LANGUAGES	Arabic (Native), English (Intermediate), French (Intermediate)

PROFESSIONAL EXPERIENCE

Backend Developer | TechTrans Company

Riyadh, KSA (Remote) **05/2023 – 03/2026**

- Built **Qada**, an association governance platform for Saudi non-profits covering memberships, boards, committees, and meetings — now sold as a product. **store.tts.sa/products/qada**
- Implemented and maintained SaaS multi-tenant architectures, improving scalability across shared infrastructure.
- Shipped well-documented REST APIs in partnership with frontend teams, and raised reliability and performance across existing Laravel systems.

LARAVEL **PHP** **SAAS** **MULTI-TENANCY** **REST APIS**

Backend Developer | Dibrah Company

Al-Ahsa, KSA (Remote) **03/2022 – 05/2023**

- Delivered complex business logic across Laravel backend systems.
- Improved monitoring and management capabilities for internal tools by introducing the Metronic dashboard template.
- Designed application databases using SQL.

LARAVEL **PHP** **SQL** **METRONIC**

Backend Developer | Rakna

Jazan, KSA (Remote) **02/2021 – 03/2022**

- Designed and implemented core business logic and backend services in Laravel.
- Built a Canva-style graphic design editor using Fabric.js.
- Delivered monitoring dashboards using the Metronic template.
- Built websites with HTML, CSS, JavaScript, jQuery, and Bootstrap.

LARAVEL **JAVASCRIPT** **FABRIC.JS** **JQUERY** **BOOTSTRAP**

Web Developer | Sesame Company

Casablanca, Morocco **01/2018 – 01/2021**

- Built e-commerce, portfolio, and agency websites using WordPress and PHP.

WORDPRESS **PHP** **E-COMMERCE**

Front-End Developer | Techtoprint Company

Casablanca, Morocco **01/2017 – 01/2018**

- Built front-end interfaces and supported website production for client projects.

INDEPENDENT PROJECTS

Matjar Lift | matjarlift.com

All-in-one e-commerce operations platform that synchronizes store administration, sales agents, and warehouse logistics in one system.

- Built real-time KPI dashboards for revenue and stock tracking, an automated seller-commission engine, and a visual order-to-delivery shipping pipeline.
- Took the product from concept to a paid subscription offering, handling the full stack alone: data modeling, backend logic, and user-facing interface.

LARAVEL PHP VUE.JS INERTIA.JS SQL TAILWIND CSS

StayFocus | stayfocus.now

Subscription-based productivity SaaS centered on Pomodoro-style focus sessions, a distraction “brain dump,” and time-boxed personal experiments.

- Implemented a live accountability map showing active users in real time, plus a full billing flow with monthly, yearly, and lifetime plans.
- Integrated AI assistants (Claude, ChatGPT) via MCP so users can capture tasks, start focus sessions, and log reflections directly from a chat interface.
